

From: CC Grisham grish@me.com

Subject: Objection: How is it Grisham was not invited by ADEQ to participate in Arkansas water quality standards review as a known stakeholder?

Date: December 31, 2014 at 3:52 AM

Dear Stephen,

Please see attached from ADEQ and info at
http://www.adeq.state.ar.us/water/branch_planning/wqs_review.htm.

Were you aware this review had been underway at ADEQ?

I feel I was intentionally cut out of this process by ADEQ "Water Quality Planning Branch" (Sarah Clem, Branch Manager) as a known stakeholders in this issue.

Sarah Clem, Tammera Harrelson, Ryan Benefield etc. of ADEQ all were very aware of my involvement in and concern for this issue.

I should have been invited by ADEQ to participate as a stakeholder in this review.

I will be interested to learn if McKesson Corporation was invited by ADEQ to participate in this review, initiated less than one year after I traveled to meet with ADEQ on April 11, 2011 regarding this very issue, a meeting also attended by EPA Superfund Remedial Branch Chief Carlos Sanchez and the former EPA RPM Shawn Ghose.

At that meeting in 2011 (please see attached transcript beginning at page five (p. 5)) I attempted to work directly with Sarah Clem in order to understand APC&EC Reg. 2, but she was unable at that time to explain to me either the Arkansas standards or ADEQ's application of them at Arkwood.

Above-referenced web page states: "Submitted to EPA for Approval March 14, 2014 - Currently under EPA review"

I request that EPA reject the ADEQ/ APC&EC adopted changes to the Arkansas' water quality standards due to improper exclusion of at least one known stakeholder: me.

Sincerely,

Curt
